

DIGITAL PROSPECTUS & ONLINE EVENTS CALENDAR 2021

A Partner, in and for the Defence Community

Our Vision

The defence enterprise is expanding as commercial industry and SMEs innovate and reshape future force design considerations. Public-private sector collaboration to solve the Defence community's most complex problems is therefore more important than ever.

Defence iQ's digital platform can provide your business with those invaluable touch points from which to enhance your brand, demonstrate thought leadership, and connect with and educate a global network of military end users and government executives about your strategic vision and latest technological developments.

Across our portfolio of marketing, market intelligence and business development opportunities, our services are designed to meet your evolving needs and achieve new business growth. From large-scale online conferences, webinars, and B2B intelligent matchmaking, to our suite of bespoke digital solutions, we have the experience and resources to help your business grow in 2021 and beyond.

Your Objectives - Building a campaign to help you achieve your business goals

Accelerated Growth

For companies looking to enter or expand within a target market, we can develop and execute campaigns that drive market penetration.

Our services:

- **Strategy development** - Identify the right audiences and channels to drive growth
- **Customised campaigns** - Deliver defined passive, marketing and sales qualified leads
- **Account-based marketing campaigns** - Focus on your top customer and prospect accounts

Build New Business

For companies looking to identify active opportunities and be front-of-mind when prospects have a new requirement.

Our services:

- **Lead Qualification and Profiling** - Gain insight into prospect's needs, budgets and timelines
- **Customer Engagement** - Taking a leading role in an interactive discussion group to engage and discover prospects' challenges and learn how to position your offering
- **Client Acquisition** - Participate in 1-2-1 meetings with senior decision makers who have capability development needs that you can support

Make your message resonate

For companies looking to educate, impress and engage prospects to show how your solutions can solve problems.

Our services:

- **Data Driven Insights** - Obtain insights into customers' needs to help inform your campaign strategies
- **Speaking opportunities** - Share your expertise and success stories with an engaged audience, helping you communicate your brand value and build relationships
- **Content Curation and Partnerships** - Create high value content which will position your brand as a thought-leader and deliver engaged responses
- **Content Distribution** - Optimise engagement with your content via our tailored multiple touch point distribution channels

"One of the advantages of attending Defence iQ events is that the military get to describe our challenges... and then our industry partners can give us an idea of what is in the realm of the possible - what technologies are out there - and then as we give them requirements, they can give us possible solutions."

General Perkins, Former Commanding General, US Army TRADOC

Connecting you with prospects at every stage

Passive Lead Generation

Build brand awareness within your target market and maximum passive lead generation

- **Content syndication** and distribution via DefenceiQ.com
- **Branding** on the DefenceiQ.com website
- **Email marketing** campaigns to a highly relevant prospect database

Prospect Lead Generation

Build brand awareness within your target market who have specifically expressed an active level of interest in a particular topical area

- Co-author a **Whitepaper** or **Scripted Interview** with the Defence iQ Editor
- Lead a **Digital Transformation Webinar** and access audience analytics
- Sponsor the production of a **Post-Event** or **Market Report**
- Take a **virtual exhibition stand** at a market-leading online conference

Marketing Qualified Lead Generation

Build credibility and understanding of your capabilities with prospects through multiple touch points and engagements

- **Gain insights** for future campaigns with interactive **polling and Q&A**
- Demonstrate thought leadership at an online conference **speaking engagement**
- Influence the market by participating in **panels and discussion groups**
- Receive contact details of your **session's attendees** and downloads of your organisation's content for follow up

Sales Qualified Lead Generation

Engage directly with prospects from your target market that have been profiled and qualified

- Use our AI-powered **B2B matchmaking** to help you make the right connections
- Organise **private and secure video** meetings during our events to build rapport and relationships with senior prospects
- Join closed-door **round table meetings**
- Host an exclusive **virtual reality** engagement

- Next Generation Combat Vehicle Discussion Group
- Future Vertical Lift Discussion Group
- Additive Manufacturing Round Tables
- Future Borders

November

- Unmanned Ground Vehicles
- Unmanned Undersea Vehicles
- Assured PNT
- Army Networks

December

- AI for Procurement
- Supply Chain Security
- Military Flight Training Round Tables

Series Overview:

This online conference series will deliver two-day and three-day online conferences to support Defence iQ's leading brand communities such as Full Spectrum Air Defence, Additive Manufacturing, Surface Warships and ISR. The series will also respond to the recent Memorandum of Agreement between the UK and U.S. that presents new opportunities for closer collaboration in innovative technology development, operational problem-solving and industrial cooperation to advance the capabilities of British and American land forces.

- Participants can expect a deep-dive into the support programmes, regulatory changes and experimental technologies changing approaches and processes in traditional spaces and also:
- Enable the exchange of programme delivery expertise across military-industry and allied partnerships and support the outreach and messaging objectives of key acquisition and innovation stakeholders
- Provide a platform for industry to inform and educate defence leadership as to the latest developments in cutting edge technologies driving the modernisation of platforms and systems
- Invite end-to-end capability development discussion by exploring the training and doctrine, requirements generation, operational and materiel perspectives of each Army modernisation priority area, at both unilateral and bi-lateral levels

These opportunities will provide you with the latest information on the technologies advancing and disrupting these sectors and give the community the chance to meet more regularly throughout the calendar year, in support of campaigns and relationship-building related to Defence iQ's largest events and these modernisation priorities.

Partnership Opportunities

- **Demonstrate your thought leadership** with a keynote address, case study presentation or join a panel discussion
- **Make an impact** with a bespoke virtual booth
- **Engage and connect** with delegates with the event's video call and chat functionality

<p>Thought Leadership Package: 20 minute speaking slot</p>	<p>Virtual Exhibition Stand</p>
<p>Influencer Package: Panel Discussion participation</p>	<p>Branded Delegate</p>

All partnership opportunities include the Online Event Attendee List.

If you would like to sponsor the Online Conference & Meeting series, please get in touch with us to discuss.

Dec 2.0 - **Supply Chain Security**

Concept

The digital transformation of defence will be a complex, multi-dimensional and iterative process of continual, whole-of-force capability modernization and enterprise integration, accompanied by core innovation accelerators such as AI, IoT, robotics, data analytics, and blockchain. Crucially, this will not be a purely technological undertaking. Culture, leadership and processes are adapting to build an enterprise that is foundationally agile and better prepared to rapidly identify, develop, test, scale and integrate new technologies continuously, and faster than our adversaries.

The technology industry is uniquely positioned to help Defence navigate the complexity of fundamentally transformative bleeding-edge technologies by aiding problem identification/solving processes and demystifying the technological elements of implementation. Indeed, industry partnerships form a core pillar of many Defence organisations' innovation and digital transformation strategies today, highlighting the need for increased knowledge sharing within and across different commercial, academic and scientific sectors as part of a wider, networked 'innovation ecosystem'.

Defence iQ's 2021 Webinar Series is designed to take the defence community on a virtual digital transformation and disruptive technology journey.

Each online event will bring thought leaders from traditional and non-traditional defence industry, SMEs and start-ups to share their expertise with defence customers and military end-users about the development and application of some of the most innovative technologies emerging today, as well as advise on core requirements, security considerations and future technology implementation.

These webinars will be made available to military, government and academic personnel for FREE. Industry can join via an annual fee which includes access to the 24 webinars across the year, on-demand catch up of those webinars, and access to an executive summary that will be produced after each.

Alexander Stephenson,
Editor & Deputy Divisional Director, Defence iQ

VIRTUAL REALITY MEETINGS

Defence iQ is currently looking for partners to join them in the development of events that support face-to-face meeting in a fully virtual environment.

If your organisation is VR-capable and you have access to a virtual reality headset, please enquire and we can arrange to meet in virtual reality to explore how this technology can facilitate the most engaging and immersive business meeting experiences, anywhere in the market.

" COVID-19 has forced us all into a 'new world' where digital experiences are now entirely normal. The Defence industry, whilst leading technology and innovation in some senses, has typically been quite traditional when it comes to marketing and communications. Now is the time to evolve! "

Head of Strategic Marketing and Communications
